

# LED Catalogue

## Marlow Integrated Designs Ltd.

Providing Lighting Solutions for over 35 years

# Warranty

## Terms and Conditions

Marlow Integrated Designs Ltd. hereby grants on the M.I.D products defined in Section 2 a 5-year spare-parts for LED Luminaires, guarantee starting from the invoice date (end customer) on the products distributed under the brand "Marlow Integrated Designs Ltd. Also known as MID Lighting" and installed in the United Kingdom, subject to the following terms and conditions:

1. A prerequisite for the guarantee is that the lighting system must be registered with MID Lighting within 90 days from the invoice date.
2. The guarantee shall apply to interior and exterior luminaires installed within the United Kingdom, as well as to other catalogue products for lighting purposes distributed under the brand "MID Lighting". Commodity goods (goods with out label/brand "MID Lighting" defined for resale) are hereby excluded.
3. The guarantee shall cover faults in material, design and/or manufacturing and shall apply to the entire product, excluding illuminants/lamps, batteries, starters and other wear and tear parts and consumables. A 5% decline in the luminous flux of the LED module per annum and a nominal failure rate of 0.2%/1,000 h in the case of electronic components such as electronic control gear and LED shall be permissible and shall not fall under the guarantee. Nor dirt accumulation, faults caused by force majeure or mechanical damage such as transport damage fall under the guarantee.
4. This guarantee is subject to verifiable compliance with the following terms and conditions:
  - The product must be used as intended in accordance with the applicable product and application specification.
  - Thresholds for ambient temperature and mains voltage must not be exceeded.
  - No modifications deviating from the product's condition at delivery (e.g. fitting of emergency lighting components, exchange of electronic control gear for third-party electronic gear, fitting of control components) shall be permissible, and installation must be carried out exclusively by specialised personnel in accordance with the assembly instructions.
  - Illuminants/lamps must conform to the IEC standards applicable to them, and only lamps explicitly designated for use (identification plate, assembly instructions) may be used.
  - Use of special retrofit lamps shall cause the guarantee to be excluded.
  - Particularly extreme ambient conditions, such as in coastal areas for example, shall be subject to written agreement with the manufacturer prior to installation. Only with such agreement can a guarantee be provided.
  - The maintenance instructions specified in the assembly instructions must be complied with. Illuminants/lamps must be exchanged forthwith at the end of their service life.
5. The guarantee shall be honoured in such a manner that, at our option, the product or the faulty components thereof shall be repaired at one of our sites or be replaced by identical or equivalent replacement products, or the product shall be taken back in exchange for a refund of the purchase price. In the case of exchange, MID Lighting shall reserve the right to deviate from the original product by reason of the technical progress, and to make any minor justifiable deviation in respect of design and features. A guarantee on the replacement products and/or parts shall, subject to these terms and conditions, be provided for the indirect or direct consequential loss, expenditure incurred in vain, fitting and dismantling costs, the cost of auxiliary resources for exchanging etc. Assembly or disassembly or disassembly costs.
6. All guarantee claims shall lapse, unless they are reported no later than 30 days after discovery of a defect, with provision of all data necessary for dealing with the case covered by the guarantee. The services may only be claimed, if the invoice/corresponding proof is presented.
7. The statutory warranty rights shall remain unaffected and shall apply regardless of the guarantee. This shall apply also to claims against the specialised distributor/installer.
8. The legal relations in connection with this guarantee shall be governed exclusively by UK law.

ILS6/A1/WH

ILS9/A1/WH

ILS13/A1/WH - ILS18/A1/WH

**- The small adjustable ILS A1 downlight is a competitive, interchangeable and architectural LED downlight system.**

**An alternative light engine to a MR16 or GU10 lamp.**

- Colour Temperatures: 3000k - 4000k
  - Beam Angles: 22°/ 36°/ 60°
- White as standard, Black and Grey also available
- Available with Dimming (/STD/DALI/SDIM/MDIM)
- Available with Emergency (/RME3/RME3-ST/RME3-PRO)
  - Materials:
    - Aluminium Housing
    - Polycarbonate reflector with aluminium coating
- Adjustable
- Offset from bezel
- Bezel Dimension Ø90mm
- Cut-out Dimension Ø75mm
- Depth: See images below or page 23

Product	MID/ILS/A1 Recessed ILS A1 Downlight			
Lamp	LED			
Lamp Power <small>Luminaire lumens (4000K)</small>	/6W 650lm	/9W 905lm	/13W 1100lm	/18W 1800lm

Emergency	/RME3 Remote Three hour maintained emergency	/RME3-ST Remote Three hour maintained self test emergency		/RME3-PRO Remote Three hour DALI addressable emergency
To Specify: MID ILS A1 9W, 60 degree beam angle, 4000k, 905lm LED downlight, with an ILS bezel attachment; A1 in white. Part code: MID/ILS/A1/9W/60D/STD/840/WH				

ILS6/A5/WH

ILS9/A5/WH

ILS13/A5/WH - ILS18/A5/WH

**- The adjustable ILS A5 downlight is a competitive, interchangeable and architectural LED downlight system.**

**An alternative light engine to a MR16 or GU10 lamp.**

- Colour Temperatures: 3000k - 4000k
  - Beam Angles: 22°/ 36°/ 60°
- White as standard, Black and Grey also available
- Available with Dimming (/STD/DALI/SDIM/MDIM)
- Available with Emergency (/RME3/RME3-ST/RME3-PRO)
  - Materials:
    - Aluminium Housing
    - Polycarbonate reflector with aluminium coating
- Adjustable
- Low profile
- Bezel Dimension Ø105mm
- Cut-out Dimension Ø90mm
- Depth: See images below or page 23

Emergency	/RME3 Remote Three hour maintained emergency	/RME3-ST Remote Three hour maintained self test emergency		/RME3-PRO Remote Three hour DALI addressable emergency
To Specify: MID ILS A5 9W, 60 degree beam angle, 4000k, 905lm LED downlight, with an ILS bezel attachment; A5 in white. Part code: MID/ILS/A5/9W/60D/STD/840/WH				

ILS6/A6/WH

ILS9/A6/WH

ILS13/A6/WH - ILS18/A6/WH

**- The adjustable ILS A6 downlight is a competitive, interchangeable and architectural LED downlight system.**

**An alternative light engine to a MR16 or GU10 lamp.**

**The downlight is rotatable through 355 degrees.**

- Colour Temperatures: 3000k - 4000k
- Beam Angles: 22°/ 36°/ 60°
- White as standard, Black and Grey also available
- Available with Dimming (/STD/DALI/SDIM/MDIM)
- Available with Emergency (/RME3/RME3-ST/RME3-PRO)
- Materials:
  - Aluminium Housing
  - Polycarbonate reflector with aluminium coating
- Adjustable
- 355° Rotation
- Bezel Dimension Ø110mm
- Cut-out Dimension Ø95mm
- Depth: See images below or page 23

To Specify: MID ILS SC 9W, 60 degree beam angle, 4000k, 905lm LED downlight, with an ILS bezel attachment; SC in black. Part code: MID/ILS/SC/9W/60D/STD/840/BK				

ILS/6W/PI/WH

**- The adjustable plaster-in ILS downlight is a competitive, interchangeable and architectural LED downlight system.**

**An alternative light engine to a MR16 or GU10 lamp.**

**The ILS PI can be used with the ILS 6W and 9W engine wattages.**

- Colour Temperatures: 3000k - 4000k
  - Beam Angles: 22°/ 36°/ 60°
- White as standard, Black and Grey also available
  - Available with Dimming (/STD/DALI/SDIM)
- Available with Emergency (/RME3/RME3-ST/RME3-PRO)
  - Materials:  
Aluminium Housing  
Polycarbonate reflector with aluminium coating
- Adjustable
- 355° Rotation
- Bezel Dimension Ø100mm
- Cut-out Dimension Ø73mm
- Depth: ILS 6W: 80mm ILS 9W: 100mm
- Square version also available

Product	MID/ILS/PI Recessed ILS Plaster-in Downlight		
Lamp	LED		
Lamp Power <small>Luminaire lumens (4000K)</small>	/6W 650lm	/9W 905lm

To Specify: MID ILS PI 9W, 60 degree beam angle, 4000k, 905lm LED downlight, with an ILS bezel attachment; PI in white. Part code: MID/ILS/PI/9W/60D/STD/840/WH			

# ILS CELL2

- The ILS CELL2 is a range of interchangeable trimmed and plaster-in bezel options.

The CELL2 has a range of reflector colours available.

The CELL2 can be used with the ILS 6W and 9W engine wattages.

- Colour Temperatures: 3000k - 4000k
- Beam Angles: 22° / 36° / 60° (/22D/36D/60D)
- Bezel Colour white and black as standard, range of reflectors available (/WH/BK)
- Available with Dimming (/STD/DALI/SDIM)
- Available with Emergency (/ME3/ME3-ST/ME3-PRO)

# GILEAD SCIENCES OFFICES

Gilead Sciences reception offices in High Holborn was lit using various recessed luminaires including the MATRIX gimbal trimless plastered in downlight, ILS fixed down lighters and LEXLED continuous recessed tape installed in an aluminium channel to form a rectangle in the meeting rooms. DALI Controls provided flexibility of operation for the staff in the reception corridors and offices.

The MATRIX range was supplied in two and three way configurations allowing the staff to direct the lighting into any area by means of the adjustable gimbal heads. Other luminaires which were supplied include:

- Titan Highly Specular
- A high quality, cost effective LED downlight with a shallow profile and IP65 rating.

**- The E4 & E6 (830/840) are stock options. Other options available to order.**

# WAFER C SURFACE

- **An architectural, circular, ultra shallow LED solution.**

- **Surface; ideal for restricted ceiling heights**

- Available in 8W (Ø 117mm), 11W (Ø 180mm), 15W (Ø 240mm), 22W (Ø 240mm) & 30W (Ø 300mm)

Circular: 461/827/1118/1556/1997 lumens

- Shallow Depth: 39mm

- Available with Dimming (/STD/DALI/SDIM/MDIM)

- Colour Temperatures: 3000k - 4000k - 6500k

- Bezel Options: White or Silver (/WH/SLV)

- Available with remote Emergency (/RME3/RME3-ST/RME3-PRO)

# ST THOMAS' HOSPITAL - DIURNAL LIGHTING

Using the MID130, MID200 and PREMLED fittings with RGB and Tuneable White LEDs and MODE controls, staff and patients are able to create a lighting setting providing patients with an improved diurnal lighting environment. Studies have found this improves morale and wellbeing in addition to energy savings.

The adjustable colour temperature of the luminaires installed makes them ideal for this hospital environment. Night time staff can control the lighting for their staff base and the ward while the daytime lighting is programmed to change the intensity and colour temperature to match daylight. This has been shown to improve the wake and sleeping patterns of patients as well as medical staff who often work long shifts.

MID/DRV/CV/60W/24

MID/DRV/CV/100W/24

MID/DRV/CV/150W/24

- 60 or 120 LEDs per Metre

- 4.8W-M - 9.6 W-M - 14.4W-M - 19.6W-M options

- Aluminium extrusion profiles and opal/clear diffuser options available, see next page for details

- LEXLED tape is supplied in rolls of 6 or 12M lengths and can be cut to length in 50-100 mm intervals

- Available with Dimming (/STD/DALI/SDIM/MDIM)

- MID Lighting are able to supply lengths to your project requirements, stated in the part number (see table below)

- Available with drivers. See driver details above for part codes. If you require a wattage that is not listed or a dimming driver

- Colour Temperatures: 3000k - 4000k - RGBW

please contact our technical department

- Available in IP20 as standard or as IP67 (/IP67)

# AT KEARNEY

AT Kearney was a challenging luminaire design project. A bespoke Y-shape Spaceline luminaire was developed with a short suspension, to appear as a recessed fitting & continue as a suspended fitting where the ceiling level changed. Both the suspended Spaceline and the matching recessed Aluline were used throughout the project providing an efficient, aesthetic and low maintenance installation. The PremLED luminaire was used for the main office areas.

The luminaires supplied for this project include:

**RADIOHOUSE**

**MID Lighting**  
Radio House, Cambridge  
- Aluline60, MID130 & TITAN

AT [WWW.MIDLIGHTING.CO.UK](http://WWW.MIDLIGHTING.CO.UK)

- A cost effective surface or suspended extruded system ideally suited for modular or continuous runs.

**This system utilises the wattages of the LEXLED range.**

- 4.8W-M - 9.6 W-M - 14.4W-M - 19.6W-M options
- Available with LED boards for a high efficiency option. Please contact technical for further details.
  - Available with Dimming (/STD/DALI/SDIM/MDIM)
  - Colour Temperatures: 2700k - 3000k - 4000k - RGBW
  - Available with a CRI90 option (Standard CRI80) (/9CT)
- Available in IP20 as standard or as IP67 (/IP67) (LED Tape only)
  - Dimensions: Length required x 55mm x 76mm
- Surface mounted as standard, wire suspension kit available (/WS)

Single circuit track (/1CT)

Single circuit track cross section dimensions (/1ct)

Three circuit track (/3CT)

Three circuit track cross section dimensions (/3CT)

Surface mounting adapter (/SMA)

- Installation: Track system is suitable for use with our TRK range and global track compatible luminaires.
- Available as either single or three circuit track (/1CT/3CT). Three circuit track is suitable for DALI dimming.
  - One and two metre lengths can be specified with either a satin silver or a white finish (/SS/WH).
- The TRK system can be constructed to suit a diverse range of applications using optional accessories. Straight connector (/SC), L shape connector (/LC) and T connector (/TC). Please contact technical for further details.
- Available with End Cap (/TRK-EC), Feed (/TRK-F), Connector (/TRK-SC), Live Feed (/TRK-EF), L Feed (/TRK-LF) and L Feed (/TRK-MF).
  - For the above components please specify (/1CT) for single or (/3CT) for three circuit for the correct system.
  - Refer to page 173 for EMLED TRK emergency fitting.

# RECESSED LUMINAIRES

## Ceiling System Options

### General Features

MID Lighting are able to offer recessing brackets for a variety of different sizes and ceiling tile styles for the range of recessed luminaires. We have successfully designed, manufactured and supplied these brackets to a multitude of projects, including W5 Regent Street, South Thames College and many more projects.

### Exposed Tee

The most common ceiling system available in 15mm or 24mm widths with other widths available. Please ensure the correct tee width and height is specified as different manufacturers supply different height tee sections. Luminaires are generally designed to lift & tilt onto the exposed tee bar but other support methods including side arm brackets or drop rods can also be specified if required.

SAS 130 Alugrid Q26/16

Armstrong Prelude Silhouette XL-Xt 15T

### Concealed Tee

A ceiling system where the ceiling tile hides all tee supports. Semi concealed systems are also available which use a main exposed tee bar with concealed cross noggin bars. Please ensure the correct tee width and height is specified as different manufacturers supply different height tee sections.

Luminaires are generally designed to fit within the tile aperture and supported via side arm brackets on the tee bar but other support methods including drop rods can also be specified if required.

Ecophon Echostop 32

Armstrong Orcal Clip-In S

### Plank ceilings & Luminaire Positioning Options

Linear ceiling tiles supported from each end only by the main tile support beam. Please ensure the correct width and height is specified as different manufacturers supply different height sections. Luminaires are generally designed to lift & tilt onto the exposed tee bar but other support methods including side arm brackets or drop rods can also be specified if required.

Luminaires generally fit within the tile aperture and supported via side arm brackets. This option is usually preferred when a tegular tile is being used. Floating luminaire: The luminaire fits within the tile aperture and supported via side arm brackets. This option is usually preferred when a tegular tile is being used. Overlapping luminaire: The luminaire trim overlaps the ceiling trim on the underside and is supported via side arm brackets. Lay-in luminaire: The most common method used with exposed tee ceiling systems. The luminaire rests directly on the tee bar removing the need for additional support brackets.

Armstrong Fastrak 331

SAS 330/Omega

SAS 200

Floating luminaire

Overlapping trim

Lay-in luminaire

### Plasterboard

Plasterboard ceilings are self explanatory. An aperture is cut into the plasterboard and lined with wooden battens to locate and support each luminaire. The luminaire is retained within the aperture via side arm brackets or directly screw fixed with its overlapping trim hiding the aperture cut.

# MID Lighting

## The Point, Paddington

### - Stile LED & Apollo G7

AT [WWW.MIDLIGHTING.CO.UK](http://WWW.MIDLIGHTING.CO.UK)

# BATTERSEA POWER STATION

The magnificent Grade II listed Battersea Power Station forms the centre-piece of an £8 billion redevelopment including a roof top marketing suite.

Over 25,000 ILS 6W to 18W down lighters were installed on the development providing an elegant finish to the interiors. The MIVP, corrosion resistant luminaire, LEXLED Tape and a range of EXIT luminaires were also supplied for this project.

MIEX EM LUMINAIRE

LEXLED TAPE

Emergency	/ME3 Three hour main- tained emergency	/ME3-ST Three hour maintained self test emergency		/ME3-PRO Three hour DALI addressable emergency
To Specify: MIVP-ECO LED LED, 31.6W, 1275mm, 3610lm, 4000k, LED surface mounted finished grey supplied complete with standard control gear. Part code: MIVP-ECO/LED/31.6W/3610lm/12/STD/840				

# TPG PARK LANE

TPG is a major development on Park Lane near Oxford Street in Central London. When redeveloping the 4th floor the client had a very precise vision for the reception and break out space. In common areas the client wanted continuous recessed aluminium extrusion and chose the Aluline luminaire. The project has three different ceiling types, plasterboard, acoustic tiles and a bespoke wood ceiling. The length of the Aluline luminaires supplied varied from 1.2m to a continuous perimeter run of 40m. Each fitting was specifically designed to fit the exact dimensions provided by the client, showcasing the versatility of our Aluline range.

In addition the WAFER circular recessed luminaires were installed in the perimeter areas of the meeting rooms and LEXLED tape was used in the foyer to highlight the plank ceiling. The EMLED emergency recessed luminaire was used to provide the emergency lighting.

**- The HI-LED range is designed for use in open areas where an even uniformity is required.**

**Suitable for very narrow aisles, general warehousing, garages and areas where a high lumen output and shallow profile body combination is required.**

- Tridonic boards providing lumen outputs from 10790-25730lm

- 5 year system warranty for LED

- Colour Temperatures: 3000k - 4000k

- Available with Dimming (/STD/DALI/SDIM)

- Available with Emergency (/ME3/ME3-ST/ME3-PRO)

- Optional daylight sensor available (/DS)

- Surface mounted as standard

- Available with chain suspension/ wire suspension/ drop rods/ trunking mounted (/CS/WS/DR/TM)

- Steel body finished white

- Opal diffuser as standard

- Dimensions: 750/1700mm x 420 x 70mm

# UXBRIDGE COLLEGE

Uxbridge College in the London borough of Hillingdon educates 3,000 full-time students annually. The College was looking for a modern recessed square LED panel to suit their new classrooms. The FLATLINE luminaire was chosen because of its high efficiency enabling the college to lower its overall carbon footprint and providing the modern LED solution which also suited the classrooms interior design style.

In addition to the FLATLINE various other luminaires were supplied to suit both interior and exterior environments. These included the stairwells, lab rooms and open plan areas.

# BURLINGTON PLACE

Burlington Place, in London's Regent Street, is a world-class, sustainable, mixed-use development that reinforces Regent Street's reputation as a major international destination. The building has been modernised to create 80,000 sq ft of office space and 32,000 sq ft of new flagship retail space. A range of high efficiency, low maintenance, luminaire were supplied to the project.

The main office luminaire had an LED board specifically developed for this project to provide an evenly lit 1300mm light. This was at the specific request of the design team. In addition the luminaire was designed to integrate with the SAS ceiling used in the offices.

EmLED LUMINAIRE

# UNIVERSITY OF HERTFORDSHIRE

A number of areas at The University of Hertfordshire have been lit over the years covering a wide range of luminaires. The LED HIGH BAY fitting, shown in the library image, suited the high ceiling of this space. Greatly reducing maintenance costs in what is an almost inaccessible area.

In other areas the MID200 down lighter has been used in the reception, PremLED in the Gym and SPORTIF in the Sports Hall. The Sports Hall is one of Europe's largest indoor sporting arenas with 12 badminton courts lit to international standards.
